## STUDENT TECHNOLOGY ACCEPTABLE USE POLICY SYCAMORE CUSD #427

**Purpose of Technology Use:** The Sycamore Community Unit School District (the "District") is pleased to offer students access to our computer network as well as the Internet. We are happy to be able to provide this service and believe it offers vast, diverse, and unique resources. Our goal in providing this service is to continue to promote educational excellence by facilitating resource sharing, engaged learning, and communication. Students' use of the District's computer network will be teacher directed and for academic-related assignments only.

**Opportunities and Risks of Technology:** Internet access will enable the exploration of thousands of libraries, databases, museums, and other sources of information around the world. Families should be aware that some material accessible via the Internet may contain items that are illegal, defamatory, inaccurate, or potentially offensive. While the purpose of school use of Internet resources is constructive educational goals, students may still find ways to access inappropriate materials. We believe that the benefits of Internet access in the form of information resources and opportunities for collaboration far exceed the disadvantages. Ultimately, parents and guardians are responsible for setting and conveying the standards that their students should follow when using media and information sources. Therefore, we respect each family's right to decide whether or not to allow their student(s) access to the Internet.

Even though the District uses robust filtering software to keep students from accessing unauthorized and inappropriate sites, no filter is guaranteed to be error free or totally dependable. Among other matters, the District is not liable or responsible for:
